

SOLAR WINDOWS LTD

ENVIRONMENTAL POLICY

With a workforce of around 65, Solar Windows is a major employer in the region and has a significant impact on the local environment. This impact arises from providing services (direct effects), for example by staff using resources and creating waste; and from influencing the environmental actions of others (service effects), for example by regulating, motivating and raising environmental awareness.

Solar Windows acknowledges its role and responsibility for the protection and enhancement of the environment. Through commitment to sustainable development and recognises that action at a local level will bring global benefits through preserving the environment and its resources for future generations. In particular the company will;

- Manage activities to ensure that the risk of pollution is controlled, minimised or eliminated;
- Reduce waste to landfill through the adoption of reduction, reuse and recycling practices;
- Minimise and make efficient use of energy in all of our activities, reduce carbon dioxide emissions and minimise the impact on global climate change;
- Reduce the need for the movement of both people and goods and encourage the use of public transport, cycling and walking;
- Reduce the use of natural resources in our buildings, vehicles and in all activities;
- Comply with environmental legislation;
- Review performance to ensure continuous environmental improvement;
- Raise awareness of sustainable development issues within the Business and with others.
