

Solar Windows Limited

Case Study: Wycombe District Council

“Solar Windows have replaced the doors and windows in 179 properties for Wycombe District Council. Over 1500 windows were replaced and each property also had new front and back doors. All the windows and doors were manufactured and installed by Solar from Spectus Window Systems’ Elite 70 profile.”

The properties are located in the Micklefield and Totteridge areas of High Wycombe, Buckinghamshire. Solar windows were selected following a demanding “single stage” tendering process and were awarded the Replacement Windows and Doors Contract (Phase 1) by Wycombe District Council.

The Contract Administrators were Ridge Property and Construction Consultants. Mr John Lewis, Solar’s Contracts Manager worked closely with Ridge to ensure the smooth running of the project.

BENEFITS

- Low Maintenance
- Commitment to quality
- Customer Care
- Cost savings

Solar Windows Limited

Spectus Window Systems

"Spectus Window Systems has been designing, extruding, distributing and marketing high quality window and door systems for 25 years. As a result Spectus has developed unparalleled knowledge and experience and is probably the most confident, proactive PVC-U systems company in the UK."

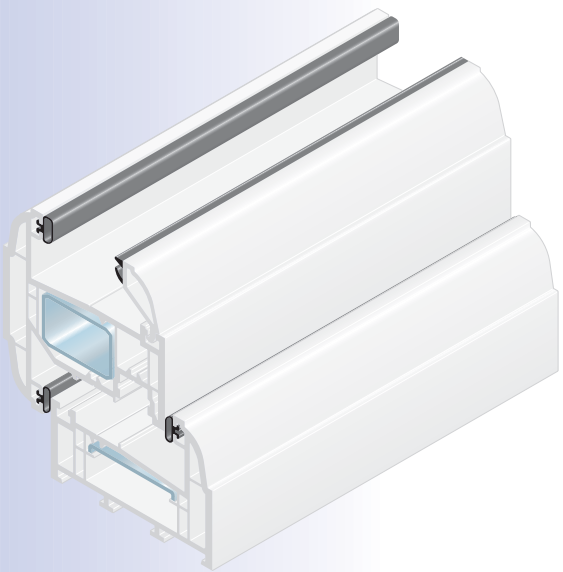

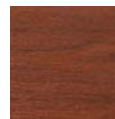

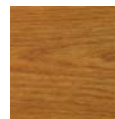

In recent years, nearly £4m has been invested by Spectus in new products, including the Elite 70 suite, which is probably the most attractive and the most technically advanced window system available in the UK and Ireland.

The system features:

- Co extruded gaskets on all profiles and beads – eliminates shrink back
- 3mm wall thickness for strength and rigidity
- Shape on all profiles and beads
- Five chambers for improved thermal efficiency

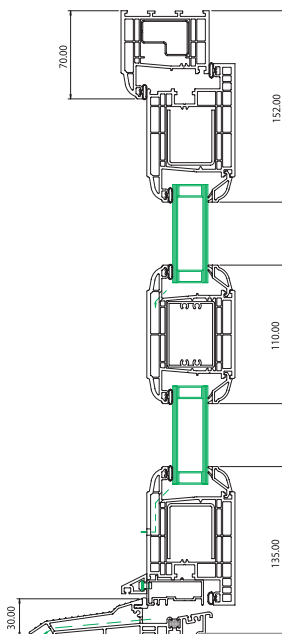

Elite 70 is available in a range of finishes:

- White
- Light Oak
- Rosewood

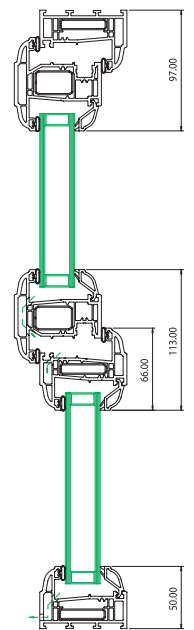

Elite 70 can be used to manufacture a wide range of window and door styles including standard casement windows, tilt and turn, French doors and residential doors.

Elite 70 is suitable for new build and refurbishment work. Its attractive design, quality and durability allows it to breath new life into old buildings.
